EDUCATION

- GLA University** Mathura, India
Bachelor of Technology - Computer Science *Aug 2023 - May 2026*

SKILLS SUMMARY

- Languages:** Java, JavaScript
- Frontend:** React.js, HTML5, CSS3, Tailwind CSS
- Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- Databases:** MongoDB, SQL
- Tools & Platforms:** Git, GitHub, VS Code

EXPERIENCE

- Coding Blocks** New Delhi
Python Data Science & Machine Learning Intern *June 2024 - Aug 2024*
 - Data Analysis Workflow:** Engineered an end-to-end data analysis pipeline for real-world datasets, performing robust data cleaning, preprocessing, and exploratory analysis.
 - Visualization & Insights:** Developed informative visualizations using Matplotlib and Seaborn to highlight data trends and actionable insights.
 - Introductory ML Practice:** Implemented and evaluated a logistic regression model using scikit-learn to predict health-related outcomes, gaining foundational ML workflow exposure.

PROJECTS

- HabitFlow - Gamified Task Manager (MERN Stack, Tailwind CSS, JWT):**
Developed a full-stack gamified task manager to improve user productivity and motivation.
 - Backend:** Engineered a secure RESTful API with Node.js to manage tasks, users, and rewards, implementing robust, timezone-proof logic for daily streaks and XP to prevent exploits.
 - Frontend:** Designed and built a responsive SPA in React, featuring a clean UI with Tailwind CSS. Implemented protected routes and centralized state management to create a seamless, secure user experience with instant visual feedback.
 - Deployment:** Deployed the application using Render for the backend and Vercel for the frontend. ([GitHub](#) — [Live Demo](#))
- Expense Management System (MERN Stack, React, JWT):**
Developed a full-stack personal finance tracker as part of a collaborative team project, focusing on secure user authentication and access control.
 - Backend:** Implemented JWT-based authentication using Node.js and Express.js, including user registration, login, password hashing, and protected routes for secure financial data access.
 - Frontend:** Developed React.js components for user signup and login, integrating form validation and API handling to ensure all expense data was securely tied to authenticated users. ([GitHub](#) — [Live Demo](#))

CERTIFICATIONS

- Python + Data Science & Machine Learning Internship:** Issued by Coding Blocks, New Delhi – [View Certificate](#) (Aug 2024)
- Java + DSA (Alpha Batch):** Issued by Apna College – [View Certificate](#) (2024)
- LeetCode Problem Solving:** Solved 200+ problems, demonstrating strong proficiency in data structures and algorithms.
